You are a spiritual being having a human experience. Heaven

comes afterwards! There is much to gain by being human too!
Think outside of the boxes your consciousness has put you in.

If you deal with your problems now you will not have to face them in the future. I find this important because all the answers are already stored in the brain. This is proven through chemistry in the mental health guide. You need to comprehend that the brain can be protective against attitude causing depression. See a doctor straight away if the issue you are experiencing does not allow an easy escape. If the medicine makes you feel bad you need to report this to every professional network you can as the problem could be more serious. For example the organs may be unable to communicate and the gut may have problems. Serotonin count is literally your ability to learn and be successful so it needs to be a top priority.

[Has the issue gone out of control beyond this procedure?](#)

[See dissociation and chemistry production procedure to resolve other critical problems. For example that will help people with a mental health disorder](#)

TENSION HEADACHE OR ACKING FEELING?

SEE

A DOCTOR AS SOON AS YOU CAN AND YOU

COULD USE A COLD BAG FROM THE FRIDGE

PROCEDURE CAN BE USED TO ASSIST IN STAYING SANE

[FLATNESS CAN ALSO BE A FORM OF PAIN WITH
NEGATIVE SYMPTOMS OF SCHIZOPHRENIA and YOU
MIGHT NEED PAIN KILLERS FROM YOUR DOCTOR IF
UNABLE TO RESOLVE NEGATIVE SYMPTOMS OF
SCHIZOPHRENIA]

Ask yourself this

- Are you enjoying yourself?
- Alcohol gives confidence (maybe 1 beer a day) but ask your doctor first if it is safe to consume any type of alcohol (for example it is dangerous on Abilify)
- Contact mental health services or get referred to a GP if you cannot resolve the situation. If the medications are not working it may take time for meds to fix situation but you should contact mental services so they can assess or explain how the medication is going to benefit you and why

If you've tried everything, you'll need to switch activities

- Have you taken your medication on time? Instead of not taking the medications why don't you consider taking the meds and fighting the situation instead! You might need a workers ethic to get things under control and make the brain work harder to adapt to your environment.

Notice your past breakthrough, coincidences and somehow things worked out for some strange unknown reason?

YOU HAVE SHIFTED TO A MORE POSITIVE REALITY OF THE HUMAN EXPERIENCE - UNDERSTAND PARALLEL UNIVERSES DO EXIST

Internal Behaviour for Cooperation

If the brain is refusing to cooperate read ALL of this!

Understand what's IN your comprehension

Understand once your vessel has reached its limit

Stop doing what you're doing at do something else if it's too hard

If you just woke up give yourself some time to wake up

If you have a mental disorder, I recommend repeating the phase in the following multiple times

in the mind so it forces a better realization

I find my brain forces me to stay away from people because it prefers me to itself. This is very serious as it means it has removed me from my partner and all my friends. A split personality (DID System) with TRS sees too many advantages to itself as its own entities decide this is way easier.

Useful ideas to take controls of bad programming/negative other symptoms etc

If you cannot use psychology to see past the situation, understand your own mind may be attacking you and this is a mental health issue. Create a positive aura using the mental health guide) and not a psychological issue. See if you can feel to force a reaction on the below statements. See the mental guide provided or contact mental health services. The fastest way to get over a psychological issue is to choose not to worry about it. So see if the brain allows this first. Otherwise continue below as there might be a few things that can still help. Take your time to allow the solutions below to process so your brain grows branches to adapt! Meditate if the issue virus will not go away. Seek help from a doctor if you feel you need it. Meditation can help file sort problems too. See mental health guide if this section doesn't work. If you have a **DID System** then check to see if it can cover up on psychology then get to wipe your memory with temporarily amnesia. and reapply it if you need it by contacting the alters or using your imagination in any way possible. You could ask yourself is your mind pushing too far? Deal with medically and professionally. See the mental health guide too.

Psychology Brain Understanding

When the mind creates or experiences an issue you need to understand the brain is simply a psychical object and infinite in consciousness

- You can then understand it only requires troubleshooting the situation to defeat a psychological issue. Once you adhere to this then you will realize the virus can be defeated. Good luck and have fun.

Paranoia

- There is an explanation for everything! So Understand that!
- Let go of internal information bothering you
- Assume ok or otherwise!
- Don't forget you have a disability or mental illness and the brain is outputting too much information which can make anyone

paranoid

Imagination Attacks

- The brain attacks with negative imagination video/audio situation when you fight something beyond your control or need a break
- When the imagination sends a video of something you do not want to see then you can react to it in a positive way in anyway

imaginable the influence and even feeling changes to a more positive experience

- Imagination can be used processing understanding a lot faster sometimes
- Use feeling to see how much bandwidth there is

You might be unable to process information correctly. Cause a confusion or lack of coherency. If nothing works you'll have to leave your room otherwise the attack might continue.

- Too many insults and even taking break won't resolve it? **Check chemistry generation procedure and contact mental health services or/and go to hospital and relize a lack of serotonin can turn the brain against you and attack you in ways you might be aware of**

- Say really to voices
- Ask the alters what do they want to do?
